Education and Qualifications

2020-2022: HSC level at St Esprit College
2014-2019: 'O' level at St Esprit College

Work experiences

AOVerse **2023-Present**

Working as a freelance UI/UX designer on a part time basis. It is an independent company which focuses mainly on websites and mobile applications.

Skill & Softwares knowledge

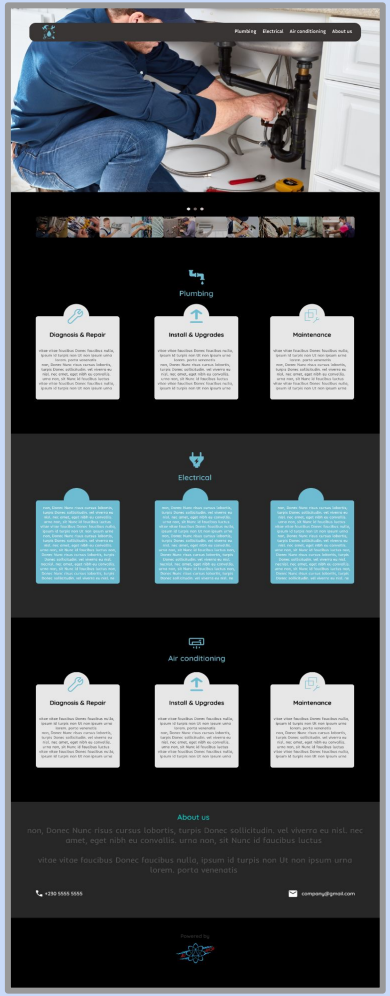
Basic knowledge in Photoshop, After Effects, Lightroom, Figma and Sketchup

Basic knowledge in Python, Visual Basic and HTML

Invision

Word, Powerpoint and Google Slides

Website(UI Design)

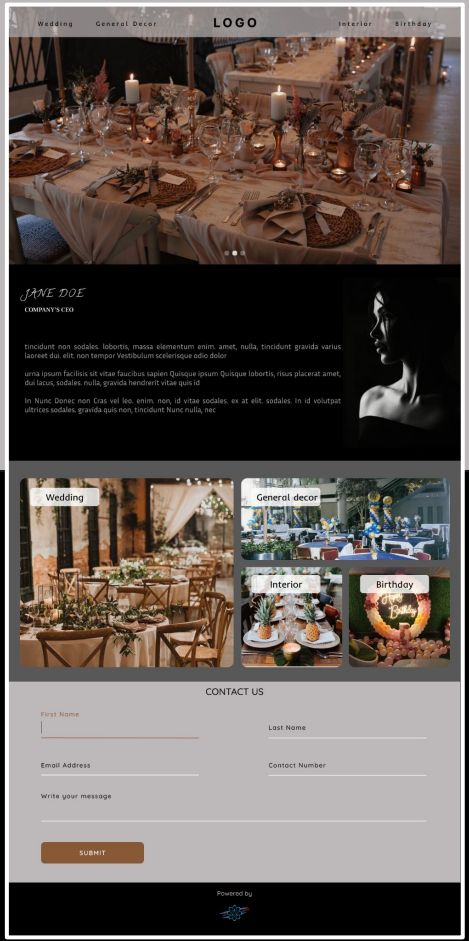


Manoj Plumbing Services

Specialised in plumbing, electrical and air conditioning

This website is mainly informative, helping the user to know what the company does and how to contact them.

It is a one page website with flipping cards..



Valentina Deco

Specialised in decoration for several events.

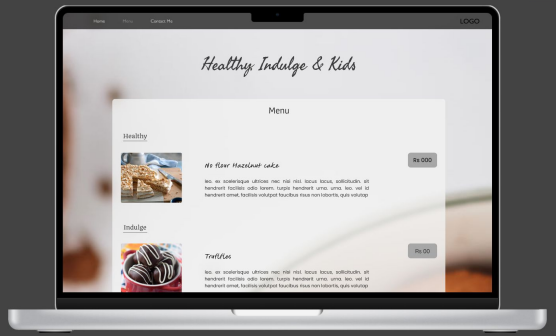
An informative website with a contact us form for the client to either get more informations or to order.

It also has a gallery with images from previous decorations to give the client a taste of the company's work and qualities.

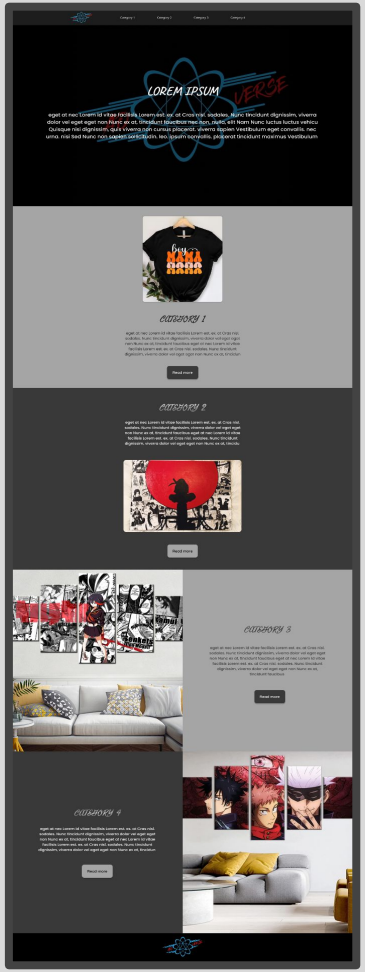
Homemade pastries

Specialised in the making of a variety of delicacies and healthy cakes.

An informative website which will help the client to view some photos of the pastry offered, to know about the CEO, to contact her for more information and to place and order.



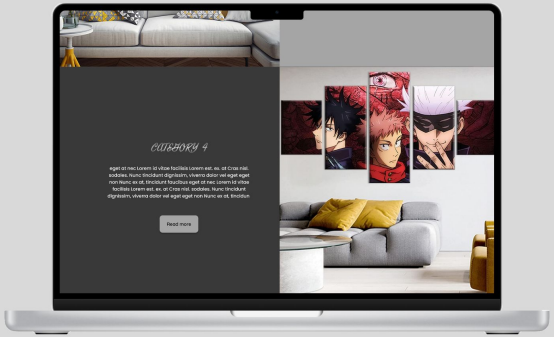
Menu (UI Design)



AOVerse

Specialised in printing on canvas and tshirts, acts also as a consultant and development of mobile applications as well as websites.

The website is mainly informative, giving the client an overview of what the company does and how to contact them for the different categories displayed.



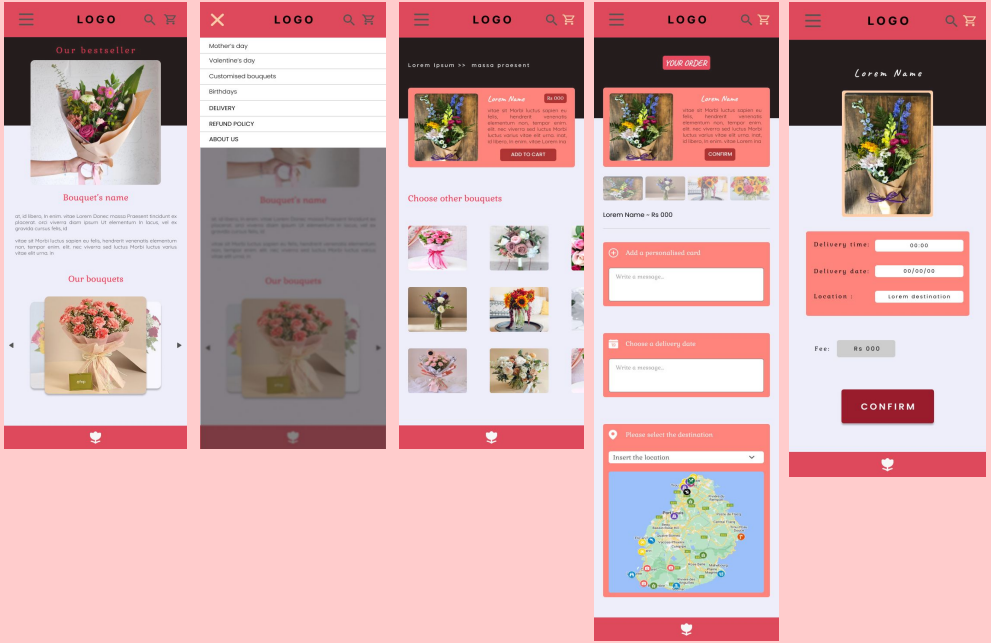
Mobile app(UI Design)

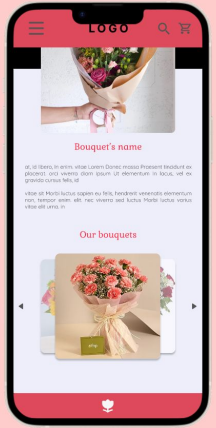
Norah's Flowers

Specialised in flowers delivery online as well as on place order.

The mobile application consists of a homepage with the bestseller bouquet displayed at first. It is an interactive application which enables the user to choose the type of bouquet, add to cart or get in contact with the enterprise.

Screens showing the process of ordering a bouquet.





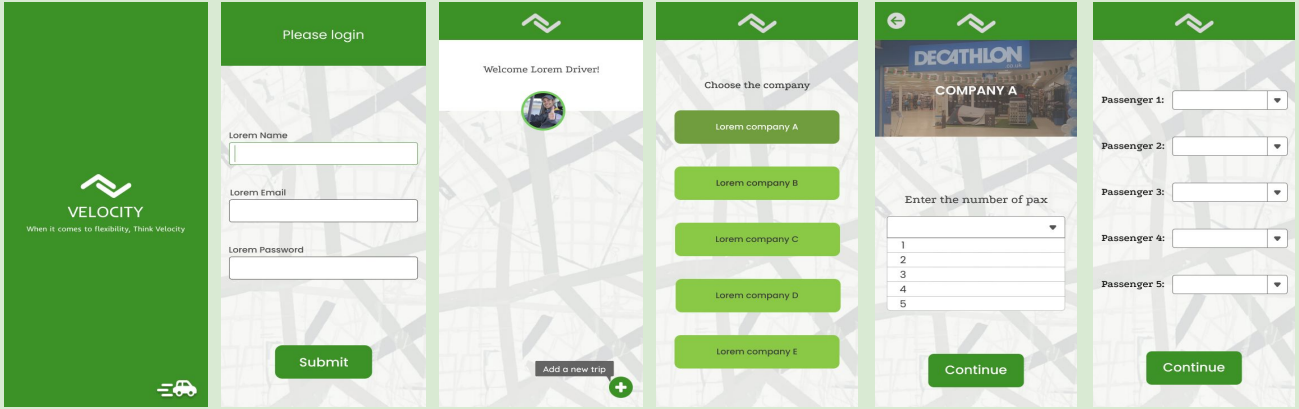
Sticky navigation bar

Velocity Company Ltd

Specialised in transport facilities for brand companies all across the island.

It consists of a log in screen for the driver. The latter is able to choose a new trip and for which company he is going to work with. He inserts the number of passengers and their destination manually.

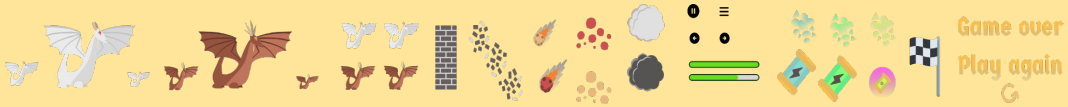
Entering passenger's destination



Gaming Concept

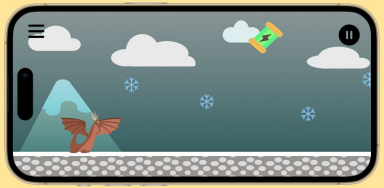
Based on Super Mario, the character walks either forward or backward. To summarise it, the game consists of evading objects falling from the sky, collecting boosts to destroy walls in order to advance towards the finishing flag.

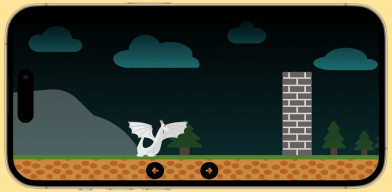
Here's an example of a full level with its obstacles.



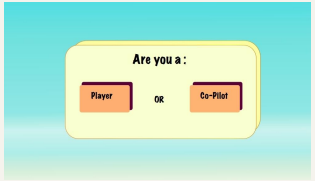
Here's an overview of different parts of the game.

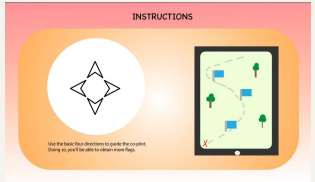
Different levels

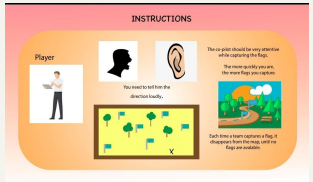


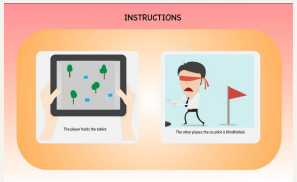


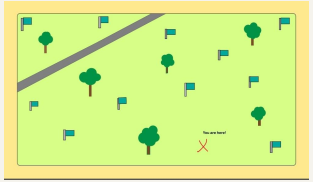
Appendix

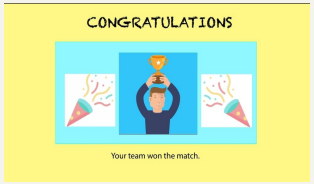












Here's the first mobile game I designed back in 2020. I used Photoshop, Illustrator and AfterEffects to conceive this Capture the flag game for an event.

This is to demonstrate the process through which I have been while learning new concepts about UI/UX, although there is still a lot to learn about.

Adrian Pothanah
UX/UI designer (web, mobile & desktop)
